FOR IMMEDIATE RELEASE

AdEdge Technologies Inc. Launches New Web Site

Buford, Ga. (October 5, 2009) – AdEdge Technologies announces the launch of its new re-designed web site www.adedgetechnologies.com. The new web site features expanded content with more photos, graphics and a new navigational structure that offers visitors quicker access to information relevant to their water treatment needs. The web site is organized to provide quick and direct access to a variety of resources including news, literature and case studies of projects completed by AdEdge.

"Our online visitors will now experience a more vibrant and seamless view of AdEdge Technologies," says Joe Naylor, Marketing Manager for AdEdge. "We've streamlined access to information about our water treatment technologies, services and markets served, while creating a more visual site that allows visitors a better opportunity to get to know our company".

Headquartered just north of Atlanta, Georgia, USA, AdEdge Technologies (www.adedgetechnologies.com) specializes in the design, development, manufacturing and supply of innovative technologies, adsorbent-based products, and integrated solutions that remove contaminants from process or aqueous streams. AdEdge offers a full range of conventional and innovative treatment technologies including adsorption, coagulation/filtration, ion exchange, metals precipitation, advanced oxidation, and membrane based solutions.
