FOR IMMEDIATE RELEASE

Rick Ide Joins AdEdge Technologies as Senior Applications Engineer.

Buford, Ga. (June 2009) – AdEdge Technologies today announced Rick Ide has been named Senior Applications Engineer. Mr. Ide will be responsible for project and new business development, applications engineering for reverse osmosis and membrane applications, filtration and ion exchange projects. In addition, Mr. Ide will be responsible for development and advancement of AdEdge’s integrated solutions packages.

“We are extremely pleased to have Mr. Ide join the AdEdge team,” said Greg Gilles, Vice President & Principal, AdEdge Technologies. “His addition continues the exceptional growth AdEdge has achieved over the past few years. His extensive applications engineering experience in water treatment and exceptional reputation in the water treatment industry will further the AdEdge commitment to providing high quality treatment solutions supported by high quality professional individuals.”

Mr. Ide brings to AdEdge more than 26 years of experience in the water treatment industry. He most recently was an Industry consultant for the industrial and commercial fluid filtration industry. Rick has extensive experience in fluid filtration and membrane technology.

Headquartered just north of Atlanta, Georgia, USA, AdEdge Technologies (www.adedgetechnologies.com) specializes in the design, development, manufacturing and supply of innovative technologies, adsorbent-based products, and systems that remove contaminants from process or aqueous streams. AdEdge offers a full range of conventional and innovative treatment technologies to achieve tough standards including adsorption, metals precipitation, coagulation, filtration, clarification, ion exchange, advanced oxidation, and membrane based solutions.
